

HEALTH PAD

SEMI-RIGID PILLOW PAD WITH 3 TECHNOLOGIES

PRODUCT DESCRIPTION:

Health Pad is a semi-rigid pillow pad that can be used on a chair or car seat and is designed to relieve pain due to Sciatic nerve inflammation, arthritis and tendonitis, thanks to the use of three different types of technology. Health Pad is ideal for additional support during everyday activities.

The inflammatory processes are balanced using the following technologies: Weak magnetic fields that penetrate up to 5 cm under the skin, Biophotonic technology and Radionics technology. (See the link to technical scientific report).

These technologies help to restore balance in the body by reducing stress and, in the specific case of this device, reduce tension in the lumbar zone, hip and the legs. They also improve circulation in these areas.

Health Pad relieves muscle stiffness and pain.

It provides healing relief from arthritis, osteoporosis, tendonitis, sprains, pain, and general pain and discomfort.

It is ergonomically designed to support a complete range of movement, with comfort and superior mobility.

Health Pad keeps you dry and comfortable even with extended use. It is very comfortable to use all day and even all night.

The fabric is very durable and of superior quality, reshaping itself perfectly after each use.

Perfect for use after surgery.

You will find a noticeable difference; the pain will diminish, the pulse will feel better and it will help you play sport and work without pain.

CHARACTERISTICS OF THE TECHNOLOGIES USED:

- Able to be worn for long periods
- Promotes joint and muscle recovery
- Offers various forms of pain relief, including from arthritis
- Improves blood circulation, stimulates the flow of oxygen to the muscles
- Minimizes injuries, provides optimal muscle support between workouts and during daily casual activities
- Can be used comfortably all day and night
- 100% latex-free

HOW TO USE

Install it on a chair, fixing it with the appropriate Velcro strings. Clean with a damp cloth.

INSTRUCTIONS FOR USE:

There are no application limits.

CLEANING AND MAINTENANCE:

Hand wash with water (maximum 30°C) and mild soap.

PRECAUTIONS:

- 1) Keep away from metals.
- 2) Keep away from electromagnetic sources (radio, TV, cell phones, PCs, etc.).
- 3) Do not apply:
 - Where there are infections.
 - To patients with high fever.
 - To open wounds.
 - Do not apply: - to the neurological part of the skull (brain)
 - To women who are pregnant or breastfeeding.
 - Near metals or electrical systems/devices (even inside the body such as metal prostheses).
 - To pacemaker wearers.

TECHNICAL DATA:

Weight: 3 kg.

Size: 70 cm x 46 cm

NB: The description and colors of the product may vary from the above due to continuous improvements both from the point of view of technology as well as comfort and aesthetics.

FUNCTIONS:

Reduce acute and chronic muscle pain, sciatic nerve pain, tendonitis and tendovaginitis.

- Creates a general relaxation in the lumbar and sacral area, in the hip and in the back muscles of the legs.
- Improve blood circulation.
- Increase the vitality of cells and tissues.
- Alleviate acute and chronic fatigue.
- Reduce compression syndrome.
- Relieve chronic lumbago.
- Improve acute and chronic back pain.
- Improve the healing of the spine.
- Improve the healing of sprains and strains.
- Reduce pain in the knees.

USEFUL INFORMATION ON SCIATIC NERVE

The inflammation of the sciatic nerve is a medical condition characterized by a peculiar pain along the lower limb, exactly where the sciatic nerve transits.

Most commonly known as "sciatica", the inflammation of the sciatic nerve is usually the result of the compression of the sciatic nerve itself or of the spinal nerves from which the sciatic nerve originates.

For the diagnosis of inflammation of the sciatic nerve, almost always the objective examination and the anamnesis are sufficient; for the recognition of the causes triggering the aforementioned condition, on the other hand, instrumental tests are needed, such as magnetic resonance and electromyography.

The treatment of sciatic nerve inflammation varies according to the severity of the symptomatology and the severity of the causal factor.

Anatomical reference on the sciatic nerve

An equal anatomical element, the sciatic nerve (or ischial nerve) is the largest and the longest nerve in the human body; in fact, it begins in the lower part of the back (at the height of the piriformis and buttocks) and runs along the lower limb (passes behind the thigh and the knee, and spreads in front of and behind the leg), up to the foot (where it is divided between the back and the plant).

Derivation of the last two lumbar spinal nerves (L4 and L5) and of the first three sacral spinal nerves (S1, S2 and S3), the sciatic nerve is a very important nervous structure for the sensitivity and motility of the lower limb, especially the leg.

What is sciatic nerve inflammation?

The sciatic nerve inflammation is the medical condition, known more properly as sciatica, which is mainly characterized by pain where the sciatic nerve passes.

Epidemiology

The sciatic nerve inflammation is a condition that affects most individuals in modern society. Sciatic nerve inflammation is more common in men than in women.

WARRANTY

2-year warranty

The product has been manufactured with great care and under constant control. You will receive a 2-year warranty on this product from the date of purchase. Please keep the receipt. The warranty is valid only for defects in materials and workmanship and lapses in the event of improper or inadequate use. Your statutory rights, in particular your warranty rights, are not limited by this. In the event of any complaints, send an e-mail to the assistance address shown below. Our service staff will respond to you as soon as possible. In any case we will provide you with personalized advice. The warranty period is not extended by any repairs under the warranty, legal guarantee or courtesy. After the warranty expires any repairs are subject to payment.
