

DPE SHIELD AGRICULTURE X

DEFENSE OF PLANET EARTH

The **DPE Agriculture Shield X** is one of the two iterations of the Advanced Technology known as the DPE X with a specific **Agricultural Component**. This device absorbs electrostatic charges, which results in an increased humidity. The particular metal alloys used release electrons which, combined with humidity and with the air, create negative air ions. The process is enormously accelerated and enhanced by room-temperature quantum superconductors.

The DPE Shield Agriculture X covers an even more expansive territory than the DPE Agriculture X, and thus **has a profound effect on your environment and our planet**.

HOW DOES IT WORK?

The DPE is grounded into the Earth, where it transfers excess energies from your protected zone to the Earth to be neutralized using room-temperature superconductivity. It also transmits energies that help to stabilise the biosphere and the Earth. And it does **much more**.

PROTECT OUR PLANET

The DPE Shield Agriculture X provides a plant **growth enhancement zone of 174.5K acres (70.5K acres)** with an **EMF protection zone radius of 40 km**.

Excitingly, the DPE Shield Agriculture X can also **remove Glyphosate and similar chemicals from the soil and protect your natural grains from GMO pollen contamination**.

The DPE Shield Agriculture X encompasses the frequencies from DC to Gigahertz, except for the **protected frequency of 13.4 HZ** which is the frequency of Life on Earth. Thus, all frequencies not in harmony with Life are transmuted in your protected area.

This **reinstates the biospheric conditions that existed on this planet 10,000 years ago**, allowing for optimal plant growth and environmental stability.

Approx. 100 cm of the tube remains above-ground, with two 100 cm rods attached

protective copper tube

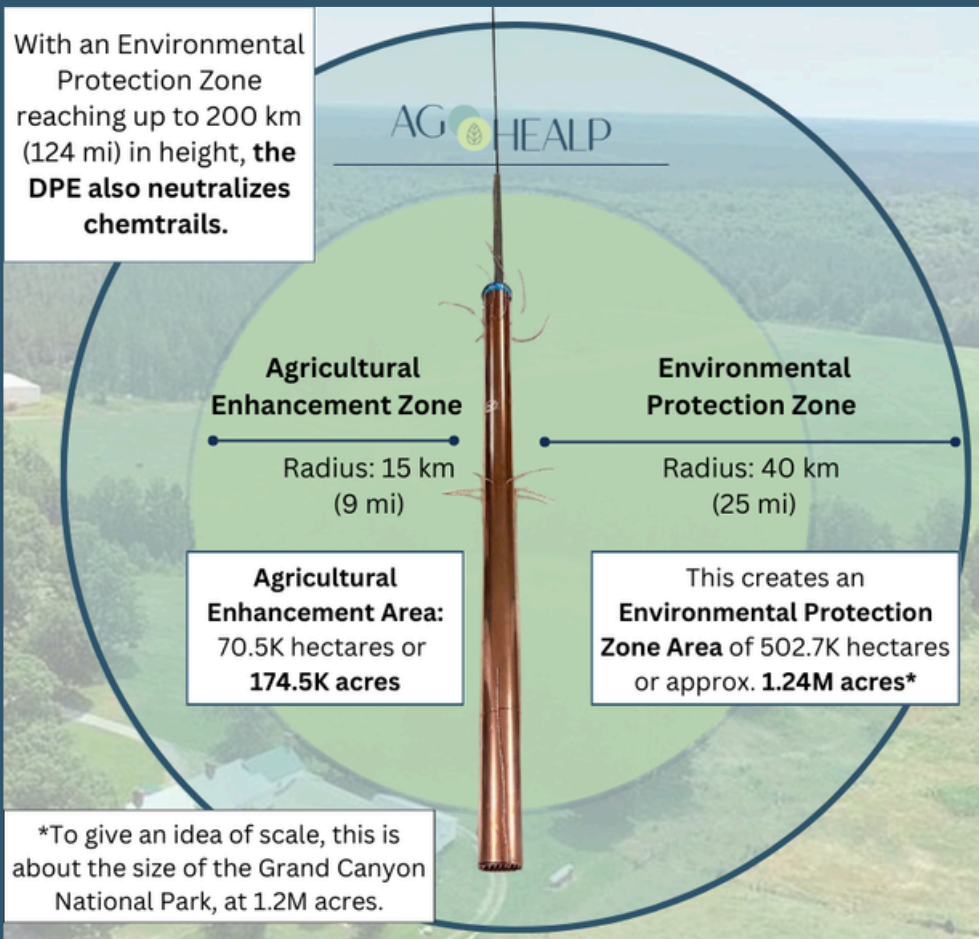

The DPE transfers energy to the ground for neutralization

WHAT ARE THE BENEFITS?

To read a full collection of customer testimonials, visit: testimonials.dpe100.com.
For more information on the DPE Agriculture X Technology, click here.

- **Drastic reduction in radioactivity & radon gas**
- **Total draining of EMF harmful to health**
- **Extends growing season & more harvests**
- **Plants have an increased resistance to pathogens & immune response**
- **Plants are healthier with greener foliage**
- **Plants grow quicker & bigger**
- **Drastic reduction in extreme weather events**

Meanwhile, approx. **50% less water is needed**, there is a **decreased need for fertilizer or pesticides**, **an elimination of frost**, and a natural reduction of the odors of animal husbandry.

PROTECTION FROM EXTREME WEATHER

By grounding excessive energies in the environment, the DPE **drastically reduces** hurricanes, lightning strikes, torrential cloudbursts, hailstorms, & high winds – **protecting your crops from increasingly frequent and extreme weather events.**

Hurricane without DPE
July 10, 2019, Italy.

No hurricane was able to form under a similar cloudburst with DPE.

DPE DEVICE COMPARISON SHEET

What forms of EMF does it protect against?

*The DPE devices protect your environment from **all types of EMF** from all sources, manmade or natural. This includes 5G, microwave, and other sources.

What is the warranty and expected life span?

All DPE devices have a **5-year warranty** with a minimum **expected life of 10 years**.

What is the impact of mountains?

Mountains will reduce the range a little, though remember these have a vertical zone that is at least 200 km high.

For certainty, assume the radius of effectiveness is reduced by 70%. So, for the DPE100 X, assume the protection zone is only 5km in radius when using around mountains. Some overlap will do no harm.

MAIN FEATURE COMPARISON	DPE100 X	DPE ZED Shield	DPE Agriculture X	DPE Shield Agriculture X
PRICE: USD	\$4,625	contact for price	\$5,269	\$8,497
EMF Protection*	✓	✓	✓	✓
Protection Zone Radius (km)	20	2500	20	40

Agricultural Zone Area (hect./acres)	-	154M / 380M	7.8K / 19.4K	70.5K / 174.5K
Radiation Protection	✓	✓	✓	✓
Wind Turbine Noise Amelioration	✓	✓	✓	✓
Animal Husbandry Odor Reduction	✓	✓	✓	✓
Length (m)	1+1+1	2.5	1+1+1	2+1+1
Device Diameter (cm)	13	33	13	13
Weight (kg)	12	110	12	25
Installation: How much above ground (cm)	50+100+100	150	50+100+100	100+100+100

* Although the DPE ZED Shield promotes plant growth, it does not act on the plants' root system as the Agriculture devices do.
