**Subject : Use of NANO SOMA a Neutraceutical Health supplement
in TB patients.**

GTB Hospital is a 1200 bedded Hospital exclusively for patients suffering from Pulmonary Tuberculosis, many of whom having Multiple Drug Resistance along with its severe complications, and are admitted for a prolong period of time with bilateral extensive lung damages.

The first experience of NANO SOMA spray being given in a 13 years old young female admitted in the Hospital with high grade fever plus severe bouts of coughing with extreme weakness and loss of appetite. **We were amazed to see 90% resolving of her symptoms in 3 flat days.**

The other 11 bottles used in similar patients gave encouraging results.

We are very grateful to Mr. Murlidhar Sharma an authorized representative of NanoRx Inc. USA for providing us with these 12 bottles of **NANO SOMA sprays** for our needy patients & also state that **we have found the Policosanol is one of the fastest acting antioxidant having a easy mode of delivery.**
